Engineering Integrity Society

The Engineering Integrity Society is an independent charitable organisation, supported and sponsored by industry. The Society is committed to promoting events and publications, providing a forum for experienced engineers and new graduates to discuss current issues and new technologies. We aim for both company and personal development and to inspire newly qualified engineers to develop their chosen profession.

Events run provide an ideal opportunity for engineers to meet others who operate in similar fields of activity over coffee and lunch. All of our events enable engineers to establish and renew an excellent 'contact' base while keeping up to date with new technology and developments in their field of interest.

We are involved in a wide range of Industrial sectors including Automotive, Aerospace, Civil, Petrochemical etc and continue to be interested in new members from all sectors.

None of the above can be done without your continued support!

Act now and become an EIS Member today.

Benefits:

EIS members receive a subscription to 'Engineering Integrity', mailed direct to your office or private address. Discounts to EIS events. CDs with all the information the Society holds on file of presentations and overheads from conferences past to present. Plus access to Task Groups, to take part, or to receive information and recommendations.

I would like to join the EIS for an annual fee of £25

I am already a Society member and would like to give the following additional amount to support the Societies activities (Please specify amount)_____

Are you a UK taxpayer? If so we can reclaim approximately 28p from the taxman for every £1 you give EIS. It's simple just tick the box to help us.
