

# ENGINEERING INTEGRITY SOCIETY

President: Dr Peter Watson O.B.E.

DURABILITY & FATIGUE GROUP  
SIMULATION, TEST & MEASUREMENT GROUP  
NOISE, VIBRATION & HARSHNESS GROUP

## **EIS Corporate Sponsorship Benefits**

There are many benefits to becoming a Corporate Sponsor:

- Selected representatives of your company are able to join any of our three committees.
- Your company name and logo will appear on all our Marketing literature, website and Society's Journal.
- Employees can attend EIS events at discounted rates.
- Employees will receive the Society's Journal, 'Engineering Integrity',
- The committee members meet other engineers who operate in similar fields of activity, and this produces an excellent 'contact' base to keep up with the latest technology and developments in their field of interest, and provides a useful base to expand their employees knowledge.
- The 'network' that exists, which the members of the EIS are part of, can be useful in gaining information on software and products available commercially. The suitability of these products when used in the 'real world', and for the application that the member has in mind, is not otherwise easy to obtain, other than the sales information that the companies provide.
- The opportunity to present information on the sponsor companies technical activities at the EIS events, which is good publicity for the company and provides an extremely useful 'personal development' opportunity to the individuals who present the information.
- Members have the opportunity to discuss with other EIS members specific technical problems they may be encountering, in a confidential environment. Other members may have encountered the same, or similar problems, and the solution to a problem is frequently forthcoming, or new lines of activity suggested.
